Subject: PRC - Health Warnings_

Lee:

I forwarded this note to Stig with a mention that Don Harris separately confirmed this information and that he has no idea how RI, BAT could have gotten the impression that we were contemplating a change in our labelling policy.

Subject: PRC - Health Warnings

I have spoken with the PRC market and we are not aware of any plans to remove HWL's from PM product in China. Product imported through the CNTIEC bears a Chinese language health warning. General export product which can be found in China bears a U.S. health warning. We do not know how BAT and RI got the impression that PM has decided to remove HWLs in China. Please let me know if you determine the source of their claim.

Regards,

Tim
